

Instructions for Windows Computers logging into the Lab remote computer

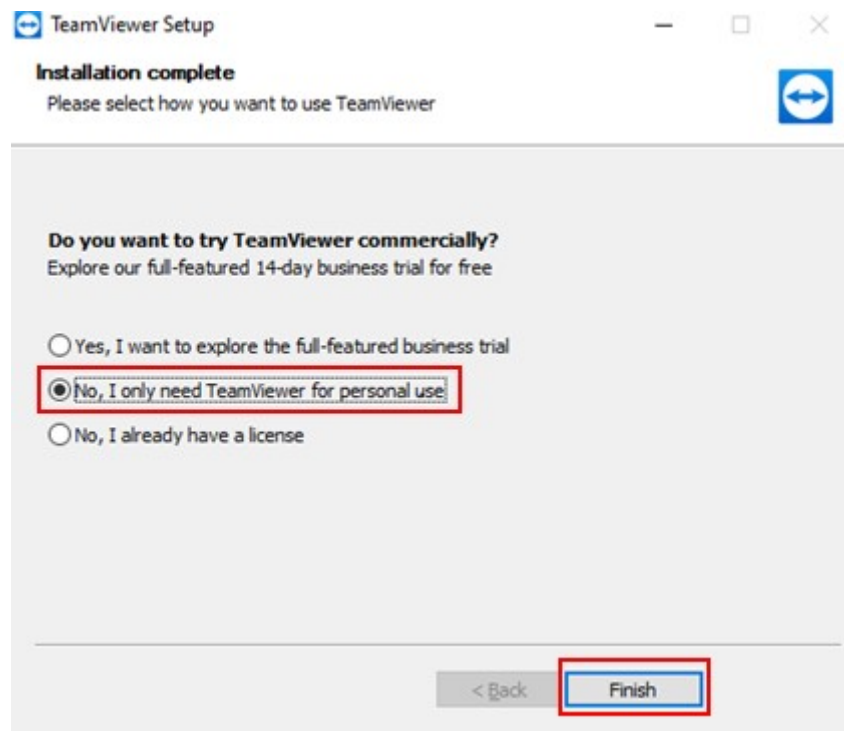

Please use TeamViewer ([personal license](#)) to remote login to your machine.

1. You will receive an ID for the remote computer, a Windows username and a corresponding password from our technical team.
2. Download the application “TeamViewer” from <https://www.teamviewer.com/en>, click on the “Download for Free” (Free for private, non-commercial use) to download.

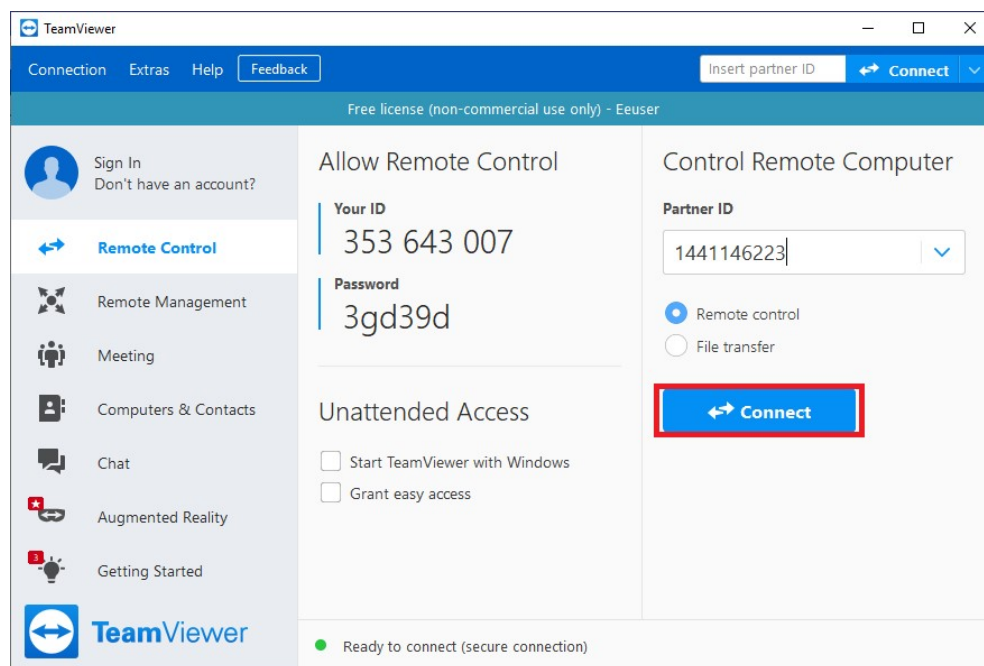

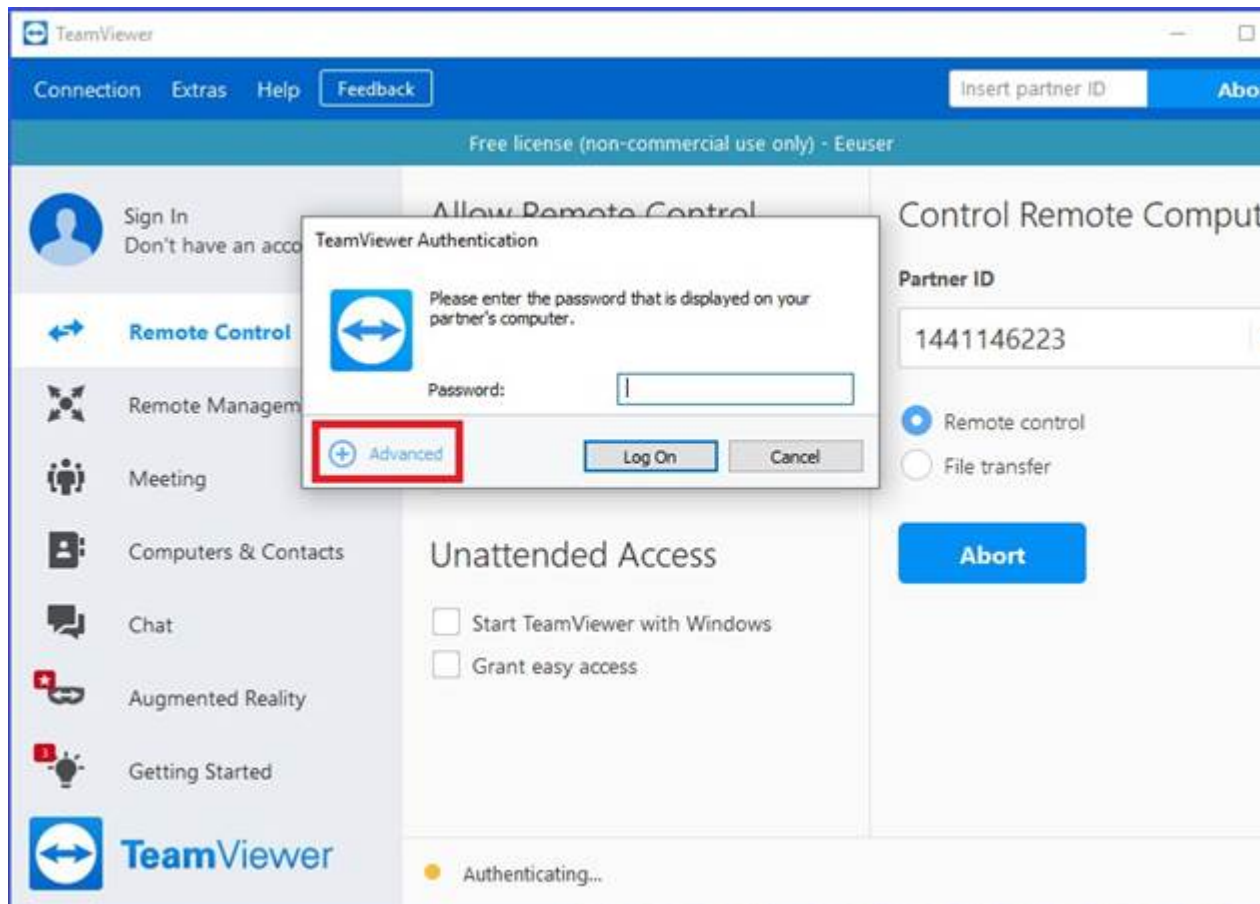

3. After the download completed, double click “TeamViewer_Setup.exe” to start the installation. Select “Default Installation”.

4. Select “**No, I only need TeamViewer for Personal use**” and click “Finish”.

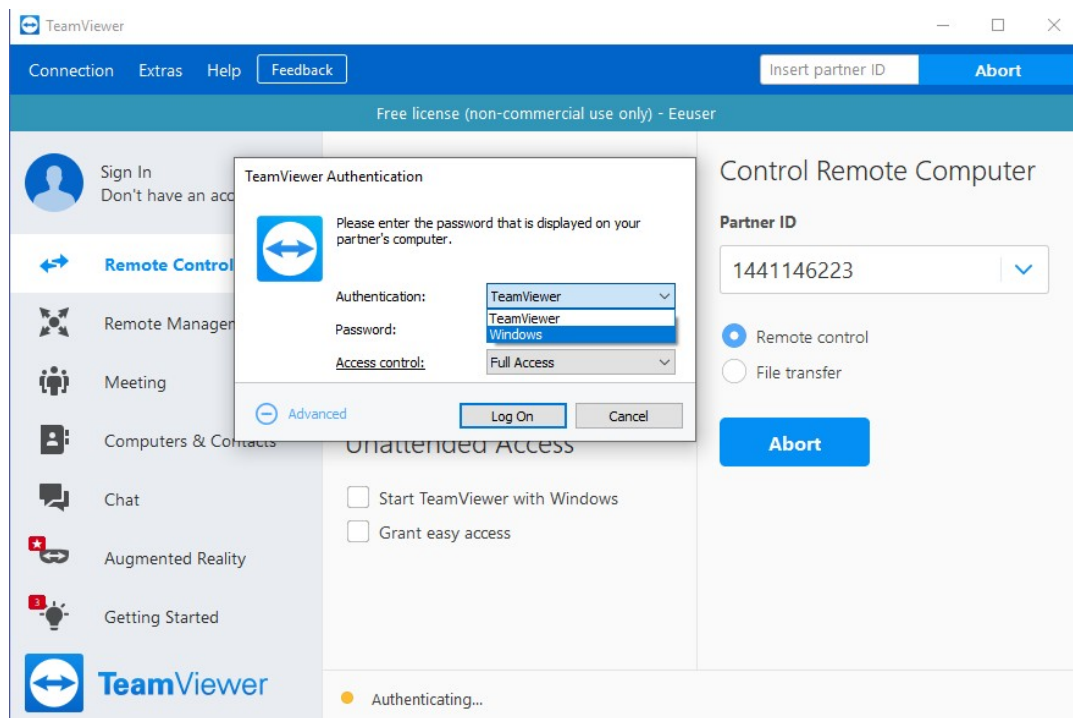

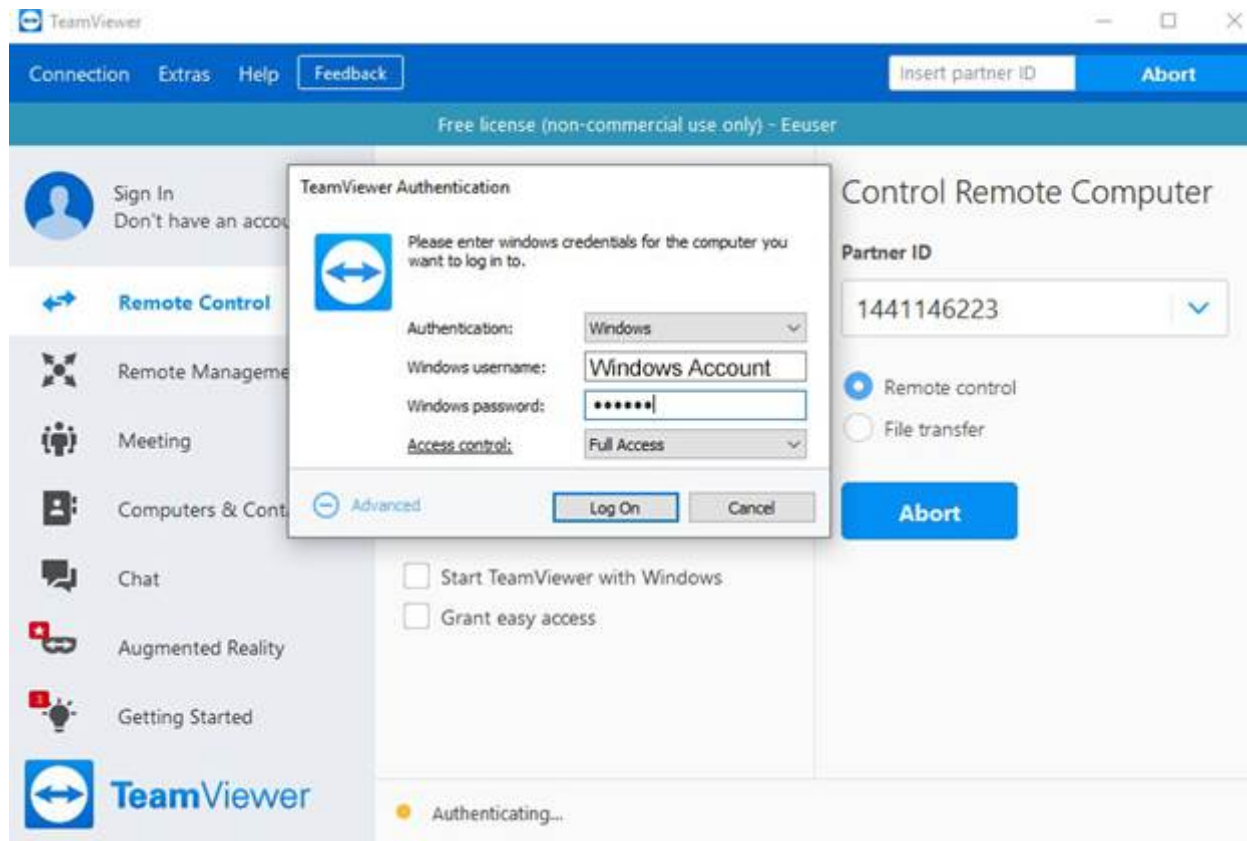

5. After the installation completed, it will start up automatically or you can double click the “TeamViewer” shortcut on your desktop to start the application. Type the ID of the remote computer in the “Partner ID” field of the “Control Remote Computer” panel, and then press “Connect”. The TeamViewer Authentication window will pop up.

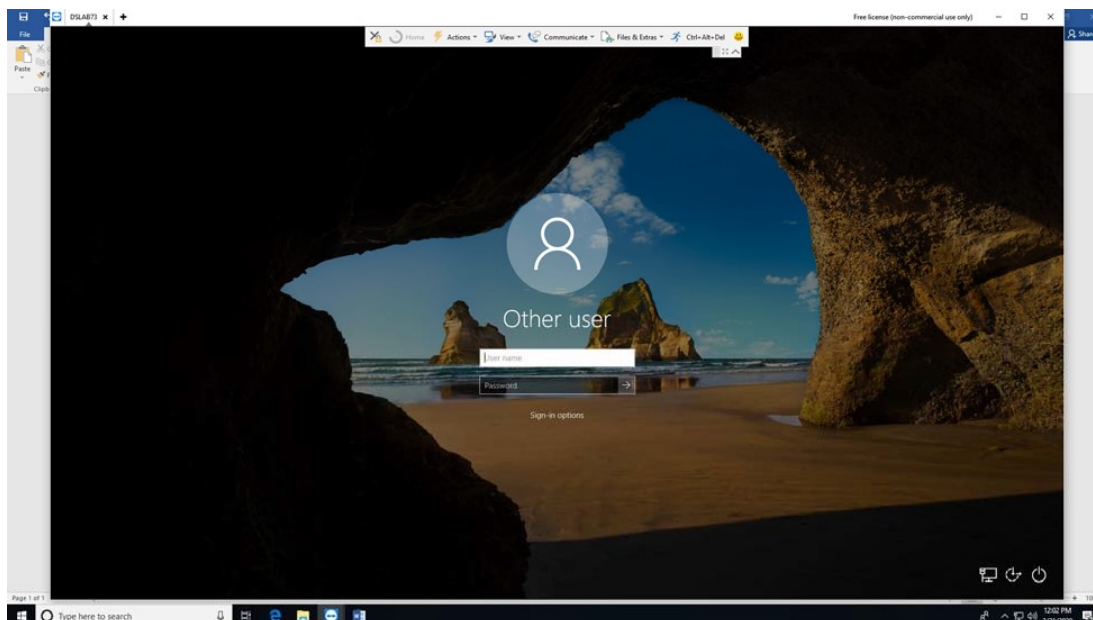

6. Press the “Advanced” label at the bottom left-hand corner of the TeamViewer Authentication window. Note that you would not enter the “Password” requested in this window. Choose “Windows” in the “Authentication” combo box. Then type in your Windows username and password.

7. You will see the following prompt. Type the Windows user ID and password again to login to the system. **If the username does not match your account name, please click "switch user" at lower left-hand corner.**
