Dear students,

EE Engineering Training in 2021 Summer

We find it more relevant to provide students with practical training through internship and extra-curricular activities, in addition to the current in-house Engineering Training model. The EE Engineering Training is revamped due to increasing time-conflicts for students participating in extra-curricular activities and fulfilling training programme requirements.

New Arrangement

EE Engineering Training is revamped into a two-week, 80-hr training in 2021 summer to address the scenario mentioned above. There are two training time-slots available to choose from, and each time slot has 120 quotas.

- Time-slot 1 (TS1): 24 May 2021 – 4 June 2021, 9:00am – 6:00pm (10 working days)
- Time-slot 2 (TS2): 15 June 2021 – 28 June 2021, 9:00am – 6:00pm (10 working days)

When to join?

Students can choose to join this training either during year 2, 3, or 4 summer terms by pre-registration. The quota will be allocated on a first-come, first-served basis. However, Year 3 and final year students will have a higher priority to register in this training if the total number of enrolled students exceeds the quota available. Students who join either time slot need to choose two out of four 5-day modules provided. If a student already completed Training I, he/she only requires to take one additional module (1 week) to fulfill the EE Engineering Training requirement.

Substituted Activities for the Engineering Training

Students may fulfill the in-house training requirement with the following curriculum or extra-curricular activities:

- Industrial Attachment Scheme (IAS)
- Oversea Internship Scheme (OIS)
- Professional Internship Scheme (EE4081) (1-year duration)
- Recognized open competitions, such as ROBOCON, ROV, and ACM
- Department UG Research Scheme

Remark: Details will be announced during the briefing session in January 2021.
