

Objective of this Case Study: to increase your sensitivity to handling data

Case Study 1

“Statistics show that 1 in 7 women in Hong Kong has experienced sexual assault but 90% of them choose not to report it.”

Then discuss the first part of the statement. Do you believe it? If yes, why? If no, why?

Think: Without looking at the next page, think about how you would check whether this is true or not.

Find

a) source of information

b) publisher

c) sample size

d) sampling method
